

Master Bedroom Mood Board!

This is a collection of inspiration colors, textures and pieces for my future master bedroom makeover! I love the look of a cooler aqua and grey color pallet mixed with warm cream tones.... The assorted textures of wood, rod iron and lace will give the room a softened, yet slightly bold look! In case you can't tell, I love the "old-world-antiquey" feel, and I feel like this unique mood board reflects my tastes perfectly!
